

Mohamed H. Mousa, PhD

Neuroengineer & Computational Neuroscientist

Philadelphia, PA • (937) 986-9196 • Mohamed.Mousa@Temple.edu • LinkedIn • Website • Google Scholar • ResearchGate • GitHub

RESEARCH SUMMARY

Neuroengineer and computational neuroscientist with 8+ years of experience at the intersection of clinical research, neural signal acquisition, and biophysical modeling. Builds Python/MATLAB/NEURON/SpikeInterface pipelines to collect and analyze high-density human (HD-EMG) and animal (in-vivo microelectrode array) electrophysiological data, and has independently led an IRB-approved human-subjects clinical study. Author of 14 peer-reviewed publications spanning motoneuron biophysics, spinal circuit dynamics, electrical-stimulation modeling, and neural decoding.

EDUCATION

- **PhD, Engineering (Computational Neuroscience)** — Wright State University, Dec 2022. Advisor: Sherif Elbasiouny, PhD. Dissertation: *Reverse Engineering Spinal Motoneuron Properties in Slice and Whole Cord Preparations Using Computational Modeling*.
- **MSc, Biomedical Engineering** — Cairo University, May 2017. Advisors: Ahmed Hesham and Sherif Elbasiouny. Thesis: *Computer Modeling of Calcium & Potassium Channels Dendritic Distributions in Spinal Motoneurons*.
- **BSc, Systems & Biomedical Engineering** — Cairo University, May 2013. GPA 3.94, ranked 1st of 105 students. Graduation project: embedded-based computer-aided diagnosis system for mammography using ML (98.6% accuracy).

ACADEMIC & PROFESSIONAL APPOINTMENTS

Temple University

Oct 2024 – Present

Postdoctoral Fellow Research Associate Philadelphia, PA

- Built end-to-end pipelines to process, decompose, and analyze 128-channel electrophysiological data using MATLAB, Python, R, and SpikeInterface.
- Conducted high-density electrode recordings from human subjects (HD-EMG) and animal models (in-vivo microelectrode arrays) across multiple experimental conditions.
- Developed Python-based analysis pipelines to quantify functional connectivity and non-linear dynamics in spinal interneuron networks using graph-theoretic and statistical methods.
- Developing and optimizing 3D biophysical computational models of spinal motoneurons and interneurons, simulating discharge patterns and post-spinal-cord-injury connectivity changes.

Wright State University

Jan 2023 – Oct 2024

Postdoctoral Fellow Dayton, OH

- Led an IRB-approved clinical study to develop a diagnostic biomarker for ALS: enrolled, consented, and performed EMG recordings on 20+ human participants; managed database design and coordination.
- Analyzed and reverse-engineered electrophysiological recordings from human and animal models to identify disease signatures.
- Developed predictive biophysical computational models, using NEURON and MATLAB, to classify ALS-related neural changes.
- Invited to submit a full application for a competitive postdoctoral fellowship (Milton Safenowitz, The ALS Association) after LOI approval; contributed to grant-writing.

Wright State University

Jun 2017 – Dec 2022

PhD Candidate Dayton, OH

- Developed 3D high-fidelity computational models of motoneurons to reverse-engineer experimental electrophysiological data from slice and whole-cord preparations.
- Modeled electrical/extracellular field potentials and characterized how stimulation parameters alter motoneuron excitability.
- Automated feature extraction from electrophysiological datasets using Python and MATLAB, reducing analysis time by 60×.

- Developed mathematical models of ionic channels to improve computational-model accuracy and replicate complex in-silico motoneuron behaviors.

Cairo University

Dec 2014 – Jun 2017

Research & Teaching Assistant Cairo, Egypt

- Taught courses in medical equipment (MRI, X-Ray), bio-electronics, data structures & algorithms, and computer vision (see Teaching Experience).
- Supervised undergraduate BCI graduation projects using P300 brain waves.
- Modeled storage and broadband requirements of medical facilities.

Maadi Military Hospital

2013 – 2014

Field Clinical Engineer Cairo, Egypt

- Supported installation, calibration, and maintenance of MRI, CT, and ventilator systems in a live clinical environment, coordinating directly with physicians and hospital engineering staff.

GRANTS & FELLOWSHIPS

- **Milton Safenowitz Postdoctoral Fellowship** (2023, 2024) — The ALS Association, USA. Project: *Identifying early biomarkers of ALS via human sEMG and computational modeling*. Requested budget: \$150,000. Letter of Intent approved; invited to submit and submitted a full proposal, which was not funded.

HONORS & AWARDS

- SfN Trainee Professional Development Award, Society for Neuroscience, 2026 — includes complimentary registration for Neuroscience 2026 (Nov 14–18, 2026, Washington, D.C.) and a \$1,000 travel award.
- Excellence Award, top PhD graduate student in biomedical engineering, Wright State University, 2023
- Science Gateways Community Institute (SGCI) Science Ambassador — \$1,200 travel award, 2019
- Travel Award, Professional Development Grant, Wright State University, 2018
- Best Paper Award, Cairo International Biomedical Engineering Conference (CIBEC), 2016
- Graduated First in Class with Distinction, Cairo University, 2013
- Recipient of Annual Excellence Award (top 5%), Cairo University, 2009–2012

Scholarships

- NIH BRAIN Initiative Summer Course — *Models and Neurobiology*, University of Missouri-Columbia, June 2017
- Research Assistant Scholar, Neuro Engineering, Rehabilitation & Degeneration Laboratory, Wright State University, Summer 2015 and 2016
- Undergraduate Research Assistant, Hochschule Zittau/Görlitz, Germany, Summer 2012

INVITED TALKS & PRESENTATIONS

- “Activity and Functional Connectivity of Lumbar Spinal Interneurons at Rest: Sparse Yet Structured.” Neural Sciences Research Day, Temple University Lewis Katz School of Medicine, Philadelphia, Dec 2025.
- “Introduction to Computational Modeling.” Ministry of Communications and Information Technology, NAID’s assistive technologies internship program, Egypt — Webinar, *Invited Speaker*, 2025.
- “Resting State Activity of Lumbar Spinal Interneurons: Keeping the Motoneurons Warm through Distributed and Functionally Coupled Subpopulations.” 14th International Motoneuron Society Meeting, St. John’s, Newfoundland, Canada, July 2025.
- “The role of computational models in experimental research: predictive vs. explanatory power.” Neuroscience Gateway Satellite Workshop, George Washington University, D.C. — *Invited Talk*, Nov 2023.
- “Understanding the Dichotomy in Motoneuron Firing Patterns: ‘Onion Skin’ vs ‘AHP’.” Wright State University Research Celebration, Dayton, OH, Oct 2023.
- “Differences between SK2 and SK3 currents in mouse spinal motoneurons: A simulation study.” Society for Neuroscience, Chicago, IL, Nov 2019.
- “Dendritic distribution of Cav1.3 and SK channels in spinal motoneurons: a simulation study.” The International Motoneuron Meeting, Boulder, CO, June 2018.
- “A Review of Below-Knee Socket Materials Using Finite Element Analysis.” 14th Annual Dayton Engineering Sciences Symposium, Oct 2018.

TEACHING EXPERIENCE

Wright State University (NCBP; Biomedical, Industrial, & Human Factors Engineering), teaching assistant:

- From Neurons to Behavior – in Health and Disease (BME 7380/BMS 9910), 2017–2024
- Computational Neuroscience (NEU 4600/PN 6600), 2021–2024
- Design and Analysis of Engineering Experiments (EGR 7050), 2018

Cairo University (Biomedical & Systems Engineering Dept.), teaching assistant, 2014–2017:

- Classic Control Systems (BME sophomore, 78 students), 2016
- Medical Equipment – MRI (BME senior, 62 students), 2017
- Medical Equipment – X-Ray (BME junior, 66 students), 2015
- Data Structure & Algorithms using C (BME sophomore, 76 students), 2015
- Computer Vision (BME senior, 66 students), 2016
- Biomedical Electronics (BME junior, 62 students), 2017
- Volunteer instructor, “Programming Under UNIX Shell in C” summer workshop, 2016
- Volunteer instructor, Medical Equipment (Radiology) summer workshop, 2015

TECHNICAL SKILLS

Domain Expertise: Computational Neuroscience | Biophysical Modeling & Simulation | Signal & Image Processing | Network & Graph Theory | Statistical Analysis | Nonlinear Dynamics | Clinical Management & IRB Protocols | Machine Learning

Programming Languages: Python | MATLAB | R | C/C++ | NEURON (Hoc, NMODL) | SQL | JavaScript

Libraries & Tools: NumPy | SciPy | Pandas | Matplotlib | Seaborn | Plotly | statsmodels | Pingouin | SAS | Spikeln-
terface | PyTorch (developing)

PROFESSIONAL MEMBERSHIPS

- Member, The American Physiological Society, 2020–present
- Member, Society for Neuroscience (SfN), 2015–present
- Member, IEEE Engineering in Medicine and Biology Society (EMBS), 2017
- Member, The Syndicate of Engineers (Egypt), Electrical Engineering, 2013–2016
- Member, International Association for the Exchange of Students for Technical Experience (IAESTE), 2012

SERVICE & LEADERSHIP

- Program Chair, IEEE EMBS International Student Conference — ISCegypt, 2017
- Chair, IEEE BME Cairo University Chapter, 2017
- Instructor, “C Programming Under Linux Shell” summer workshop, 2016
- Coordinator, BME Project Development Competition, Cairo University IEEE EMBS Chapter, 2015
